# POST-ITS ZENTANGLE

1. Take a Post-It note
2. Draw straight and curved lines across it in random shapes
3. Use a black pen or pencil to make patterns in each shape on the paper
4. Experiment with shading, large and small patterns and shapes, thick and thin lines

## NOW TRY:

Lay a few Post-Its next to each other when they are finished to make a large zentangle

## ADD COLOUR:

Make two zentangles with the same patterns and shapes - make one using one colour only and one multi coloured and notice how different they look  
Experiment with larger paper and different sized squares
